

To Whom It May Concern,

My name is Matt Der. During Summer Session 2 in 2014 at UC San Diego, I taught CSE 150 – Introduction to Artificial Intelligence: Probabilistic Reasoning and Decision Making. Here is a brief description of the course:

This course will introduce students to the probabilistic and statistical models at the heart of modern artificial intelligence. Specific topics to be covered include: probabilistic methods for reasoning and decision-making under uncertainty; inference and learning in Bayesian networks; prediction and planning in Markov decision processes; applications to intelligent systems, speech and natural language processing, information retrieval, and robotics.

Adam Li audited this course and earned an A as his final grade. He was in the top 25% of the class and, despite only auditing, was one of the most active participants.

If you would like more details regarding the course or have any questions at all, please contact me at mfder@cs.ucsd.edu.

Thanks,

A handwritten signature in cursive script that reads "Matt Der". The signature is written in black ink and is positioned below the "Thanks," text.
